What we're building toward.

“

Help meet strategic modeling, slice-and-dice, analytics, and reporting needs of business users across the enterprise.

“

Deliver value-based leading technology to enterprises through a simplified approach to business problem-solving.

I.

II.

Introducing MyOlap.

Your personal OLAP cube.

Cube the power of your spreadsheet — analyze your data, your way.

THE PROBLEM

Procuring, setting up, and building performance measurement and analytical systems is expensive and time-consuming for organizations of every size. Proprietary OLAP and relational databases — and the cloud vendors that host them — take your data off-site and sell it back at a premium.

THE OPPORTUNITY

Finance teams need agile, modern data-analysis tools that scale from small to large datasets without added complexity. A personalized OLAP modeling tool — intuitive and end-user managed — can deliver slice-and-dice agility at a fraction of current licensing and cloud costs.

THE PRODUCT

MyOlap creates and shares analysis and reporting cubes that blend individual business needs with corporate reporting data — delivered through a familiar Excel Add-in.

Personal multi-dimensional modeling — right on your laptop.

Model your business, stream your data, slice, dice, analyze, and report at scale and speed through an Excel Add-in interface.

01

Spin-up

Data models receiving data from multiple sources.

02

Native Excel

Excel experience to use full model functionality.

03

Corporate & Departmental

Reporting with ad-hoc slice-and-dice analytics.

04

Consolidate & Extend

Analyze and report from Excel, extend with Power BI.

05

No IT dependency

Multiple models, flexible, unrestricted dimensions.

06

What-Was / Is / If

Historical, stress-test, strategic modeling and M&A scenarios.

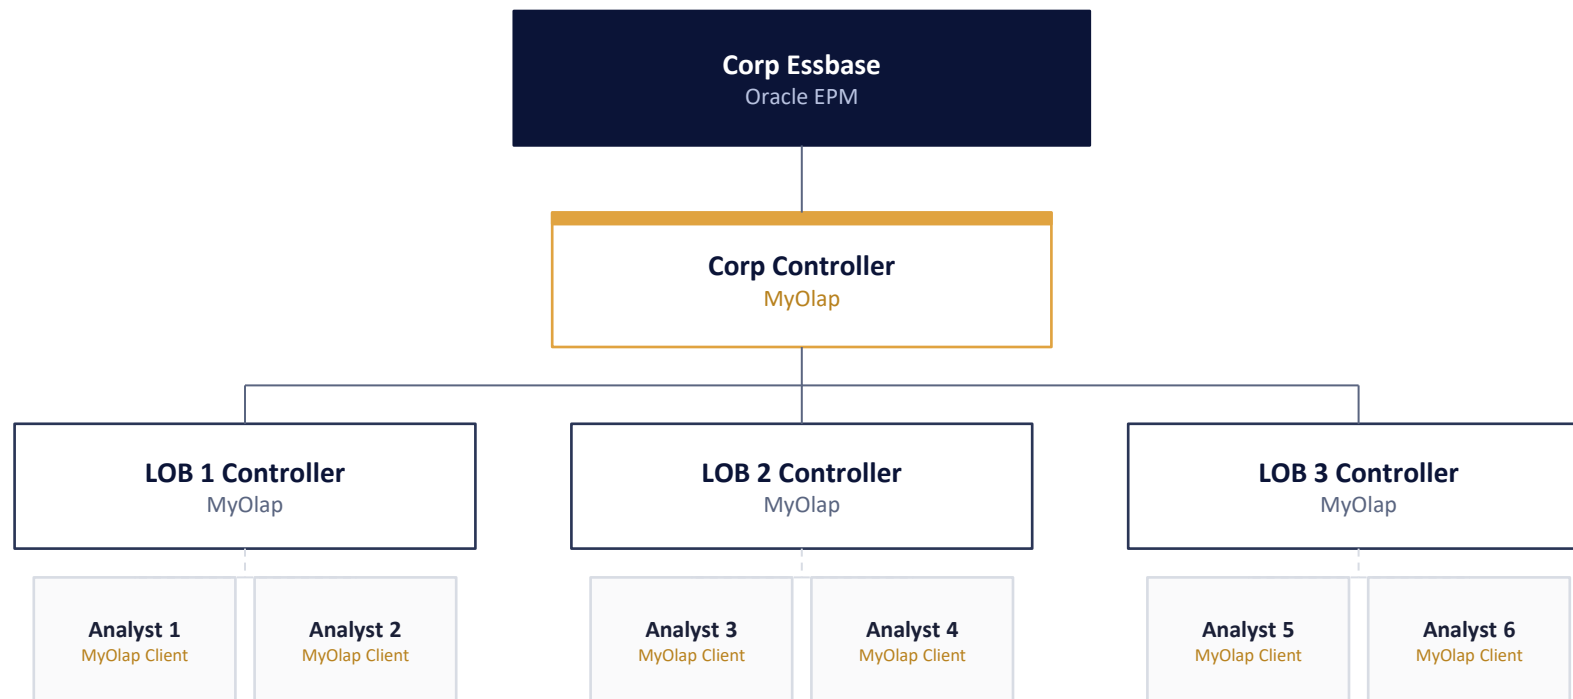

What MyOlap delivers.

- ✓ **Client-based personal OLAP models**
Multiple models tailored to specific business needs.
- ✓ **Private and shared models**
Structures and data saved or shared via OneDrive or Google Drive.
- ✓ **MS Excel-based interface**
A familiar user experience for analytics and reporting.
- ✓ **UYOD — Use Your Own Device**
No on-prem or cloud infrastructure dependency.
- ✓ **Serverless architecture**
Client / peer-to-peer distributed OLAP with local compute.
- ✓ **Speed-of-thought analytics**
Fast, responsive OLAP model instances for ad-hoc slice and dice.
- ✓ **Small-footprint client**
Downloadable .exe — runs on any platform with MS Excel.
- ✓ **Device-tied data security**
Client device authentication with password-protected admin access.

Case 1 • Enterprise

Corporate Controller distributes models to LOB Controllers; analysts connect to LOB models.

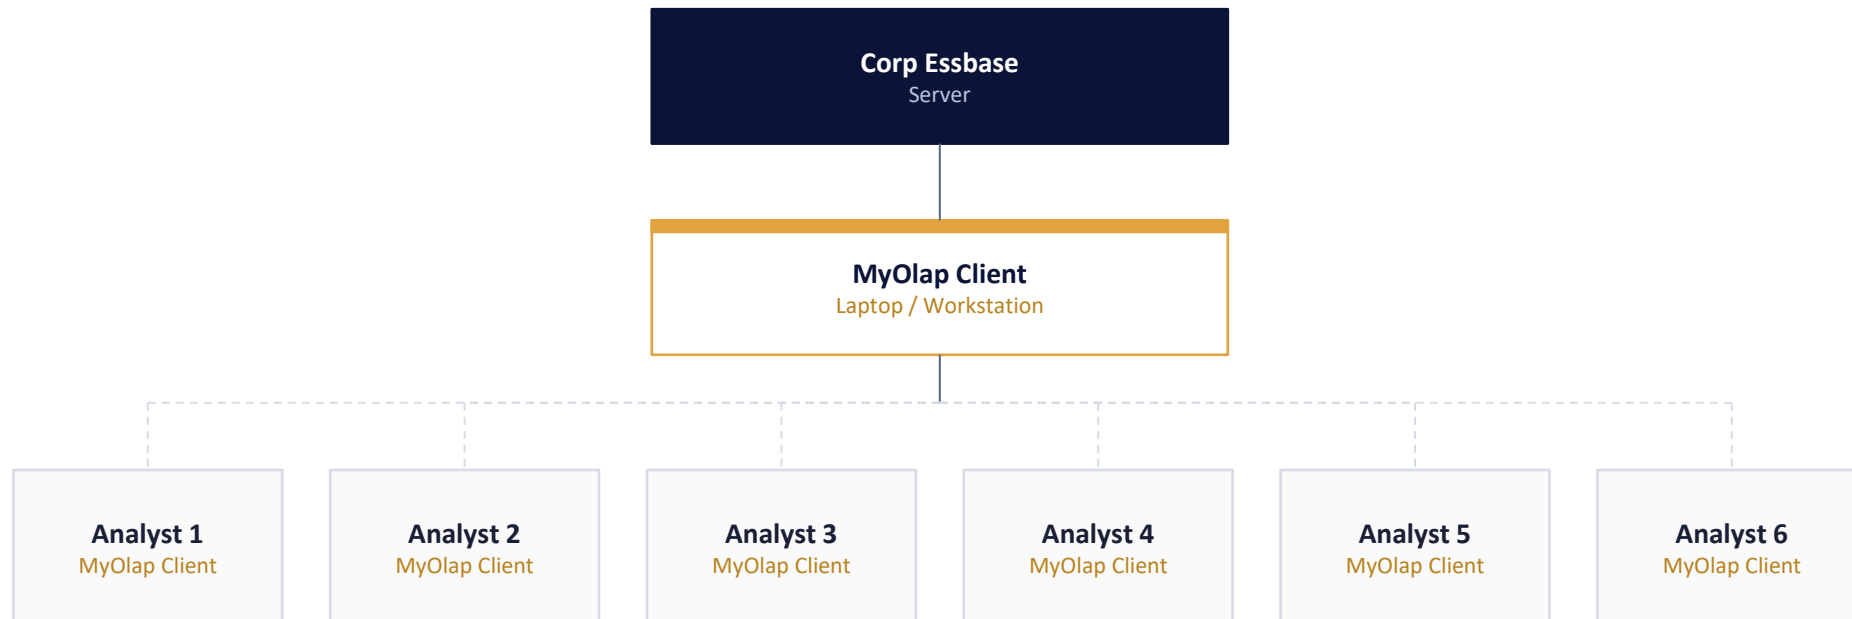

OneDrive / SharePoint • Model shares & data storage

Case 2 • Enterprise + Essbase

Direct Essbase / Oracle EPM server integration — analysts access MyOlap client on their laptops.

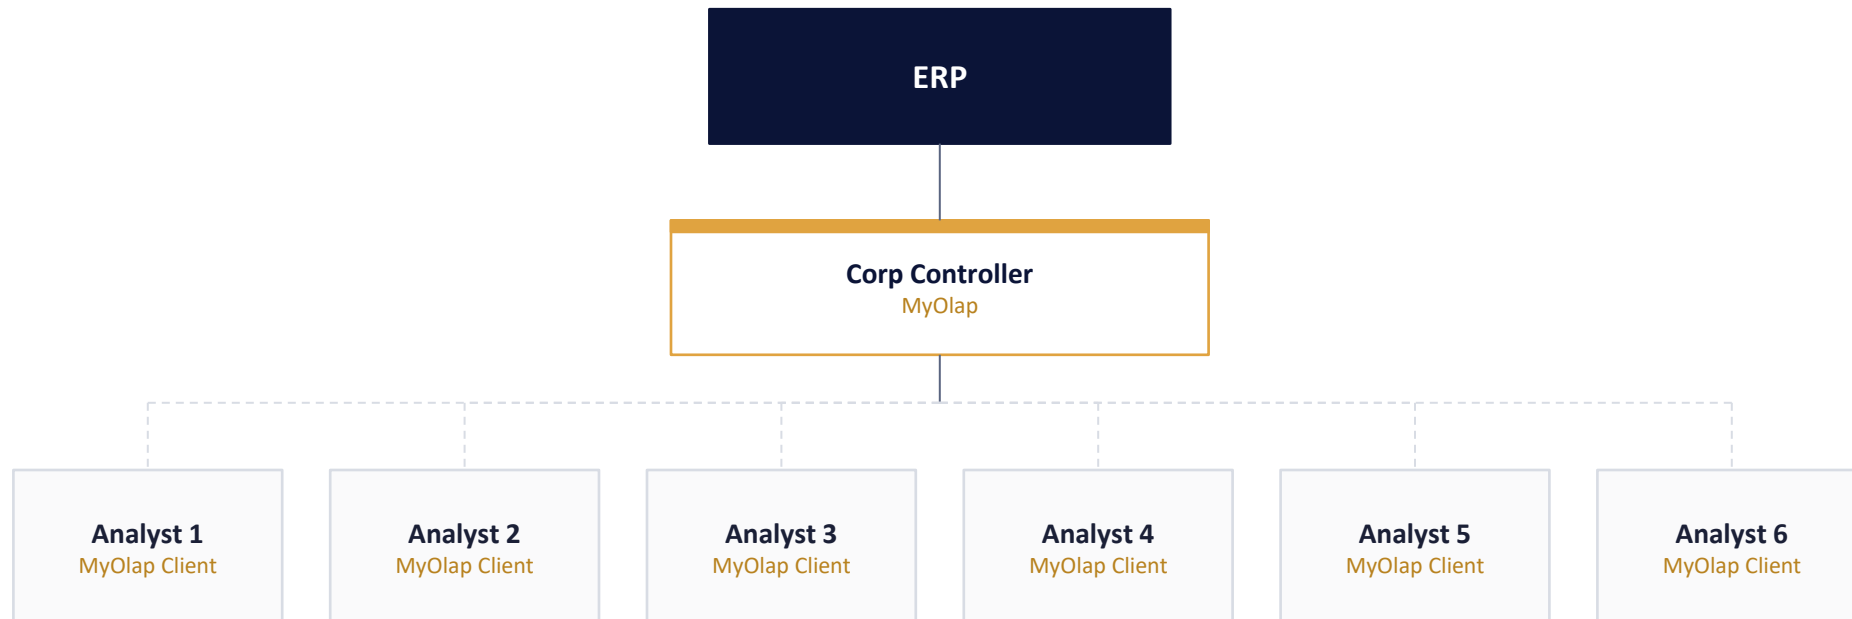

☁ OneDrive / SharePoint • Model shares & data storage

Case 3 • Mid-size Business

Corporate MyOlap Controller connects to the ERP; analysts use MyOlap on their devices.

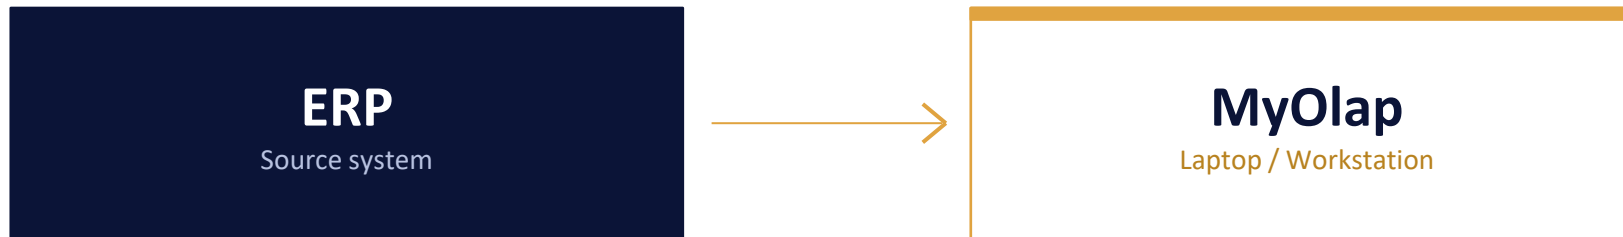

☁ OneDrive / SharePoint • Model shares & data storage

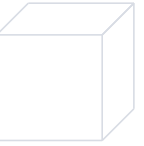

Case 4 • Small Business

Solo or small team: a single MyOlap instance on a laptop or workstation connects directly to the ERP.

Direct, lightweight, no infrastructure required.

☁ OneDrive / SharePoint • Model shares & data storage

Simple licensing. Continuous delivery.

01

Per-User / Enterprise

Software and support subscription model — per-user or enterprise-wide licensing to fit organizations of any size.

02

Periodic Updates

Regular software updates ensure users always have the latest features and fixes, delivered directly to the Add-in.

03

Distributed via Add-in

Updates flow automatically through the MyOlap Excel Add-in — no manual installation or IT involvement required.

Agile sprints, release-based refinements.

RELEASE 1.0

RELEASE 1.5

RELEASE 2.0

Prototype

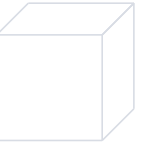

- Core OLAP engine
- Basic dimension management
- Excel Add-in skeleton
- Proof-of-concept slice & dice

Consolidated Aggregation

- Full aggregation engine
- Slice & dice analytics
- Reporting framework
- OneDrive model sharing

Enterprise Ready

- Peer-to-peer distribution
- Advanced security
- Power BI integration
- Performance at scale

From idea to launch.

01 Validate value proposition and identify target business segments.

03 Define architecture & strawman functionality (already available).

05 Establish prototype scope and timelines.

07 Establish the MyOlap.com team.

02 Identify key business champions & sponsors — Vishnu M, Steve M, Peter, Graham.

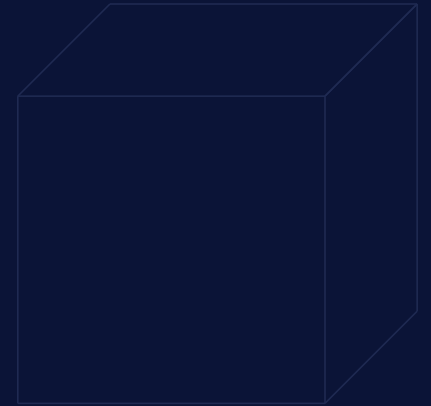

04 Identify core tech stack and dev team — Microsoft 365 platform, Oracle Essbase.

06 Build prototype and demo value prop with champions, sponsors, and partners.

08 Plan go-to-market next steps.

Let's see it in action.

A live walk-through using an industrial wholesale dealer scenario.

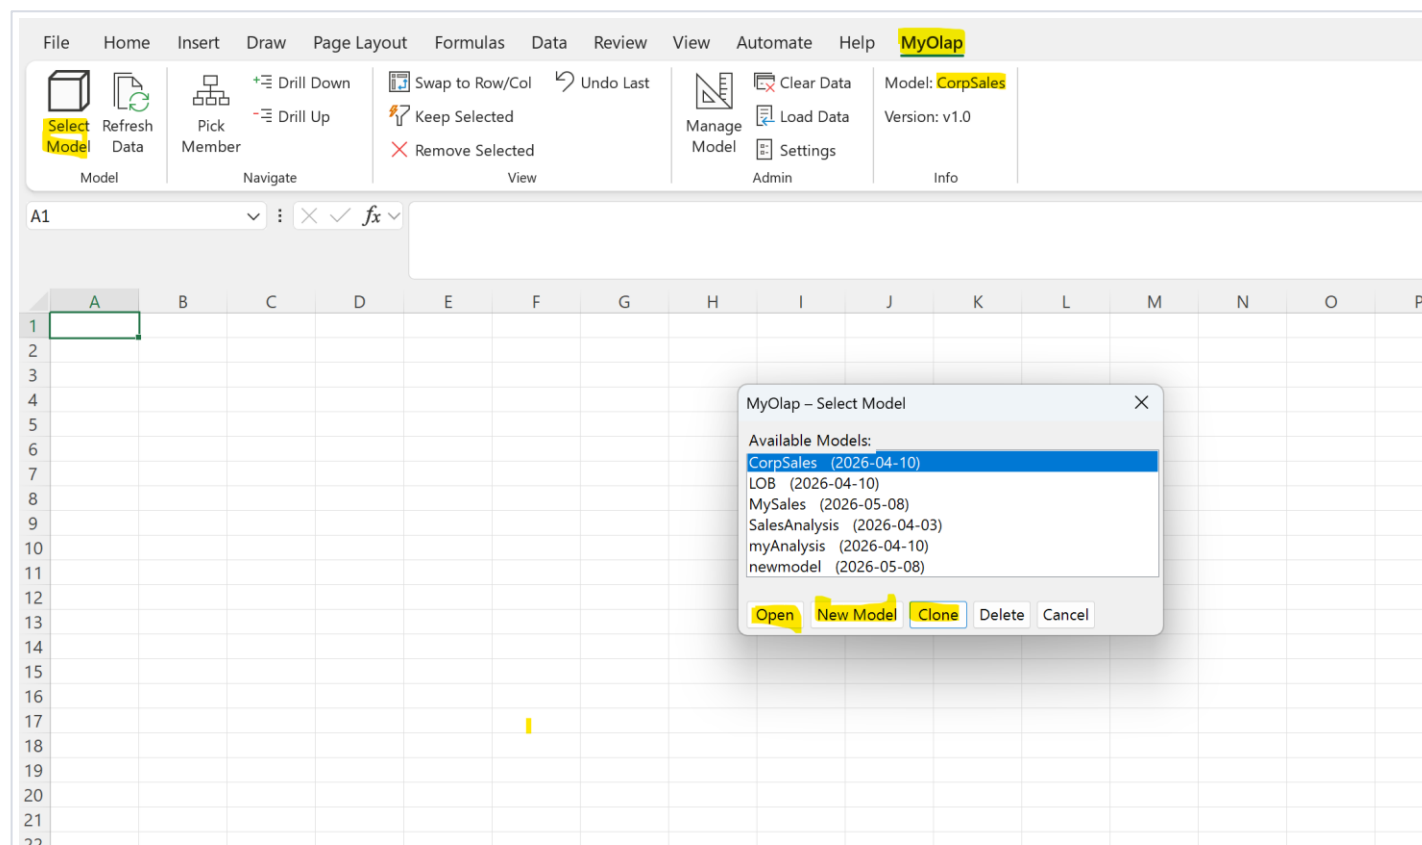

- 01** Start with a blank Excel sheet.
- 02** Industrial wholesale dealer scenario: 1 Corp Controller, 3 Finance Analysts.
- 03** Show creation of a Sales Model.
- 04** Build dimensions, load data.
- 05** Show flex-dimensionality and navigation functionality.
- 06** Create a quick report.

Select a model.

Clone from an existing local or shared model, or create a new one. Shared models are read-only for the receiving analyst — only the owner can modify them.

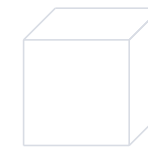

Default view of the model.

On selection, all available dimensions appear. Use Refresh Data to update a modified view.

The screenshot displays the MyOlap application interface. At the top is a ribbon menu with tabs: File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Automate, Help, and MyOlap. The MyOlap tab is active, showing a group of icons: Select Model (highlighted), Refresh Data (highlighted), Pick Member, Drill Down, Drill Up, Swap to Row/Col, Keep Selected, Remove Selected, Undo Last, Manage Model, Clear Data, Load Data, and Settings. To the right of the ribbon, the 'Model' section shows 'CorpSales' and 'Version: v1.0'. Below the ribbon is a formula bar with a dropdown arrow, a list of symbols (X, checkmark, fx), and the text 'Time'. The main area is a spreadsheet with columns A through M and rows 1 through 12. Row 1 contains the text 'Year: All Years View: All Views Version: All Versions BU: All Stores'. Row 3 contains 'Measure' in column A and 'Time' in column B (highlighted with a yellow background). Row 5 contains 'Trading Profit' in column A and '50,905,672.24' in column B.

	A	B	C	D	E	F	G	H	I	J	K	L	M
1	Year: All Years	View: All Views	Version: All Versions	BU: All Stores

Pick a member.

Select members from any dimension and place them on columns or rows as desired.

The screenshot displays the MyOlap application interface. The top menu bar includes File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Automate, Help, and MyOlap. The ribbon below the menu bar has tabs for Model, Navigate, View, Admin, and Info. The 'Pick Member' button is highlighted in the 'Navigate' tab. The main area shows a spreadsheet with columns A through N and rows 1 through 27. The spreadsheet content is as follows:

	A	B	C	D	E	F	M	N
1	Year: All Years	View: All Views	Version: All Versions	BU: All Stores				
2								
3	Measure	YearTotal						
4								
5	Trading Profit	50,905,672.24

Build your dimensions in minutes.

Load from XLS or CSV files with dimension info. Add custom dimensions for strategic modeling, what-if scenarios, and M&A modeling.

The screenshot displays the MyOlap software interface. The main window shows a data table with columns for dimensions and measures. The 'Sales - Goods - Stock' dimension is highlighted in yellow. A 'MyOlap - Manage Model Structure' dialog is open, showing a hierarchy of dimensions and measures. The 'Sales - Goods - Stock' dimension is selected. A 'MyOlap - Load Dimension' dialog is also open, showing the 'Source File' as 'C:\MyOlap\TestData\Sales_Dimen...' and the 'Sheet / Tab' as 'Measure'. The 'Load Dimension' dialog has a 'Load' button.

Year: All Years	Measure	YearTotal	Q1
600000		664,331.88	42
600010		7,240,442.00	2,20
600020		2,142,348.88	1,26
600030		5,263,670.00	1,80
600040		5,160,363.20	32
600050		5,364,462.96	23
600100		25,835,618.92	6,25
600110		4,531,644.48	4,06
600120		6,916,441.04	67
600130		1,524,233.24	53
600200		6,075,820.32	5,33
600210		19,048,139.08	10,60
600220		16,755,716.28	37
600230		13,781,657.08	2,555,632.36
600300		10,859,201.44	8,483,414.20
601000		12,389,912.32	1,317,196.20
601010		53,786,487.12	12,734,480.28
601100		4,258,136.88	378,982.04
601200		4,258,136.88	378,982.04
602000		102,928,382.00	29,965,225.24
602100		2,749,977.76	775,898.60
602200		4,207,115.36	587,257.76
602300		6,957,093.12	1,363,156.36
602400		2,217,614.84	830,120.92

Load data from anywhere.

CSV, XLS, direct ERP connectors, and your own supplemental data — all into one model.

The screenshot displays the MyOlap application interface. The top ribbon includes tabs for File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Automate, Help, and MyOlap. The MyOlap tab is active, showing options like Model: LOB, Version: v1.0, and buttons for Select Model, Refresh Data, Pick Member, Drill Down, Drill Up, Swap to Row/Col, Keep Selected, Remove Selected, Manage Model, Clear Data, Load Data, and Settings.

The main workspace shows a table with the following data:

Year: All Years	Version: All Versions	Customer: All Customers	Product: All Products	BU: All Stores
Measure	YearTotal Actual	YearTotal Budget	YearTotal Forecast	
Trading Profit	47,683,545.30	41,865,331.40	37,715,303.90	

A 'MyOlap - Load Data' dialog box is open, showing the 'Data File' as 'C:\MyOlap\TestData\Sales_Data Sample.xlsx'. The 'Column → Dimension Mapping' table is as follows:

File Column	Map To	Role
Customer	Customer	Dimension
Product	Product	Dimension
Year	Year	Dimension
Time	Time	Dimension
Account	Measure	Dimension
Value	(none)	Value (Numeric)

The dialog box has 'Load Data' and 'Cancel' buttons at the bottom.
