

Feedback - Proposed Updates and Visuals

Bright Green: marked tested and completed by Nanda

Mar 19, 2026

1. User interaction is as follows

- a. Select Model – do not refresh sheet if sheet is not blank, Refresh automatically if the sheet is blank with default view – see #5 below
- b. Sheet should be refreshed when user selects “Refresh Data”
- c. In the manage Model option, a button needed to provide option to update selected dimension from the excel tab with the same name. E.g. “Measure” dimension will be updated from the excel tab with the **same name** when the button “Create from Tab” is selected. A tree view will be displayed with the nodes and leafs highlighted in a visually pleasing view. The dimension member for accounts will have a “Plus” or “Minus” or “ignore” sign to show if its value is added or subtracted when aggregated. This field will be updated from the ConsolOp column in the dimension table. The member formula will also be picked up from the Formula column. This is relevant for the prototype for Measure and Time dimensions
- d. Remove the add-ins tab – see highlighted in below
- e. Show a cube as the icon for the Select Model option
- f. Show icons for all actions that are missing icons e.g. Drill-down.
- g. Change Swap Row/Col to Swap to Row/Col
- h. Screen not rendering in readable proportions
- i. Remove version # from MyOlap add-in menu item
- j. Show an Info group with
 - Active Model: Sales
 - Add-in version: v2.2

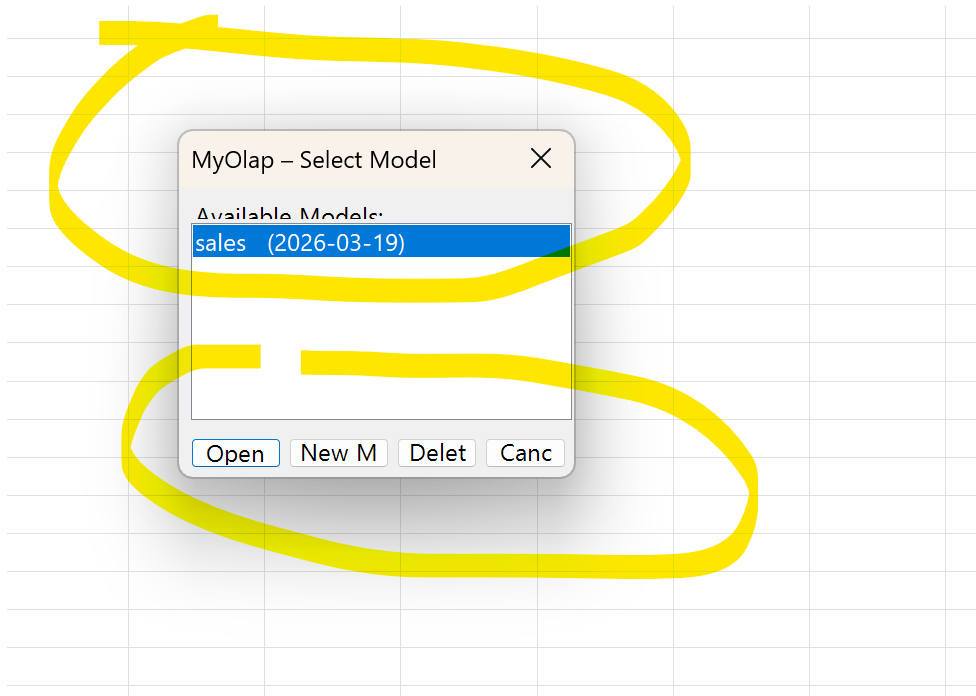

2. For Export PDF option, instead, if possible provide Print PDF option to export Dimension Tree view for selected dimension. This will be helpful to review parent-child format in the Tabs in hierarchical trees

Sample Measure Dimension Tree Preview in Excel shown below:

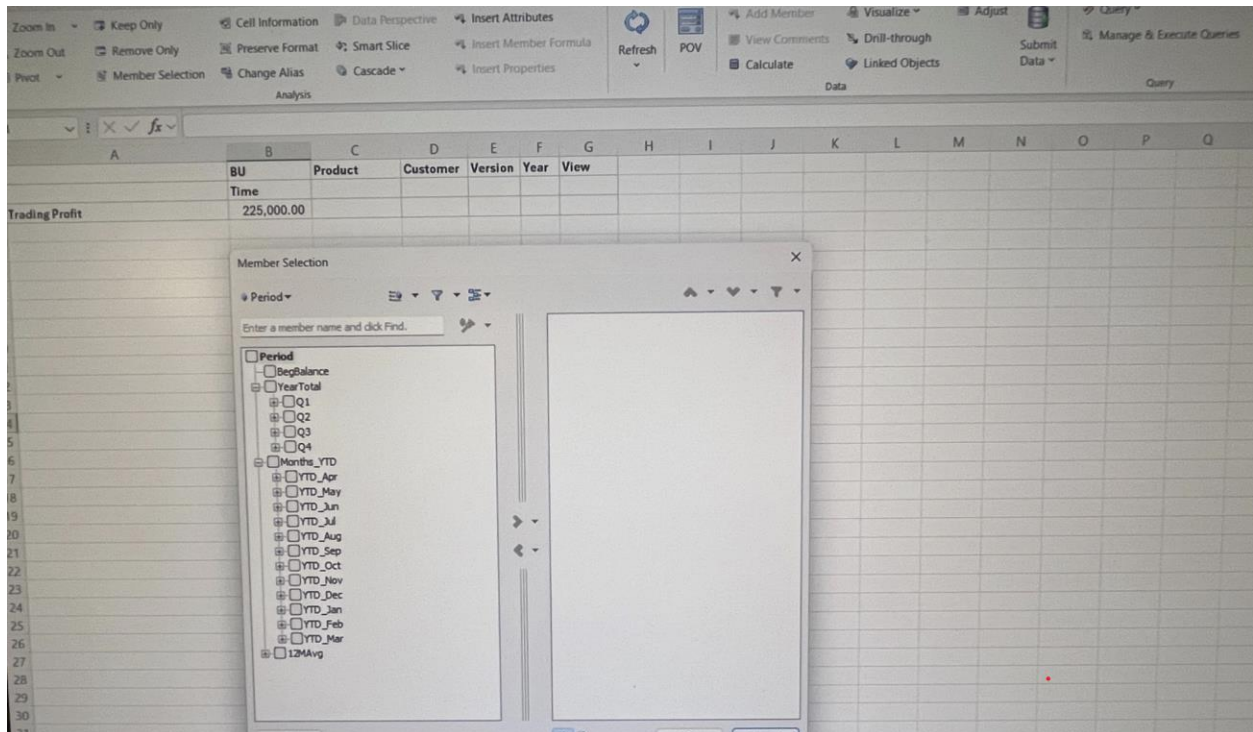

Sales	Sales - Goods	Sales - Goods - Stock	600000.000	Sales - Goods - Stock - Collected - Account
			600010.000	Sales - Goods - Stock - Collected - Cash

			700010.000	Cost of Goods Sold - Stock - Delivered
			700020.000	Cost of Goods Sold - Stock - Showroom
		Cost of Goods Sold - Specials	700100.000	Cost of Goods Sold - Stock - Specials / Non-Stock - Collected
			700110.000	Cost of Goods Sold - Stock - Specials / Non-Stock - Delivered
		Cost of Goods Sold - Manufactured / Installed	700200.000	Cost of Goods Sold - Stock - Installed - Collected
			700210.000	Cost of Goods Sold - Stock - Installed - Delivered

3. Please provide a Clear Data option above Load Data: Provide option to Select View and Year or Clear All Data. E.g. View: Budget, Year: FY26
4. The <new model> button should create the default dimensions in this order: automatically

Measure, Time, Year, View and Version

5. Default View when a user selects a MyOlap model should be as below
- **Measures** in the Rows, **Time** in the Column
 - Other dimensions (BU, Product, Customer, Version, Year and View as **Top Line row 1**)
 - Member selection window should show the tree structure and appear as below or better

Mar 27, 2026

Add an option in the Manage Structure to **Load Members** and **Print to PDF**

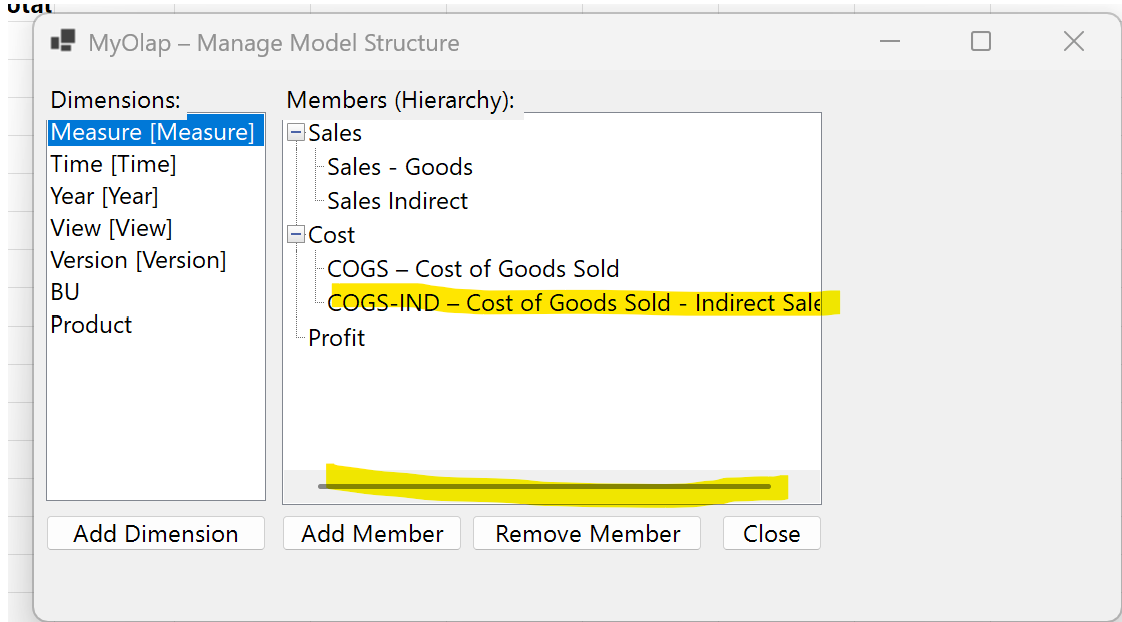

6. Enable **double click** on any dimension to drill down to the next generation. Same as clicking on drill down option to next generation
7. In the drill down, show parent members in bold, to show that there are children below.
8. In the initial view, show dimension names in bold
9. When drill down on parent, include the parent after the children

The screenshot shows the MyOlap v2.3 application interface. The top ribbon includes tabs for File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Automate, Add-ins, Help, and MyOlap v2.3. The MyOlap v2.3 tab is active, showing options like Select Model, Refresh Data, Pick Member, Drill Down, Drill Up, Swap to Row/Col, Keep Selected, Remove Selected, Undo Last, Manage Model, Load Data, Settings, Admin, Export PDF, Report, and Info. The main area displays a spreadsheet with columns A through P and rows 1 through 19. The spreadsheet contains data for 'Year: FY26', 'View: Actual', 'Version: Draft', and 'YearTotal'. A dialog box titled 'MyOlap - Manage Model Structure' is open, showing a list of dimensions (Measure, Time, Year, View, Version, BU, Product) and a hierarchy of members (Sales, Cost, Profit).

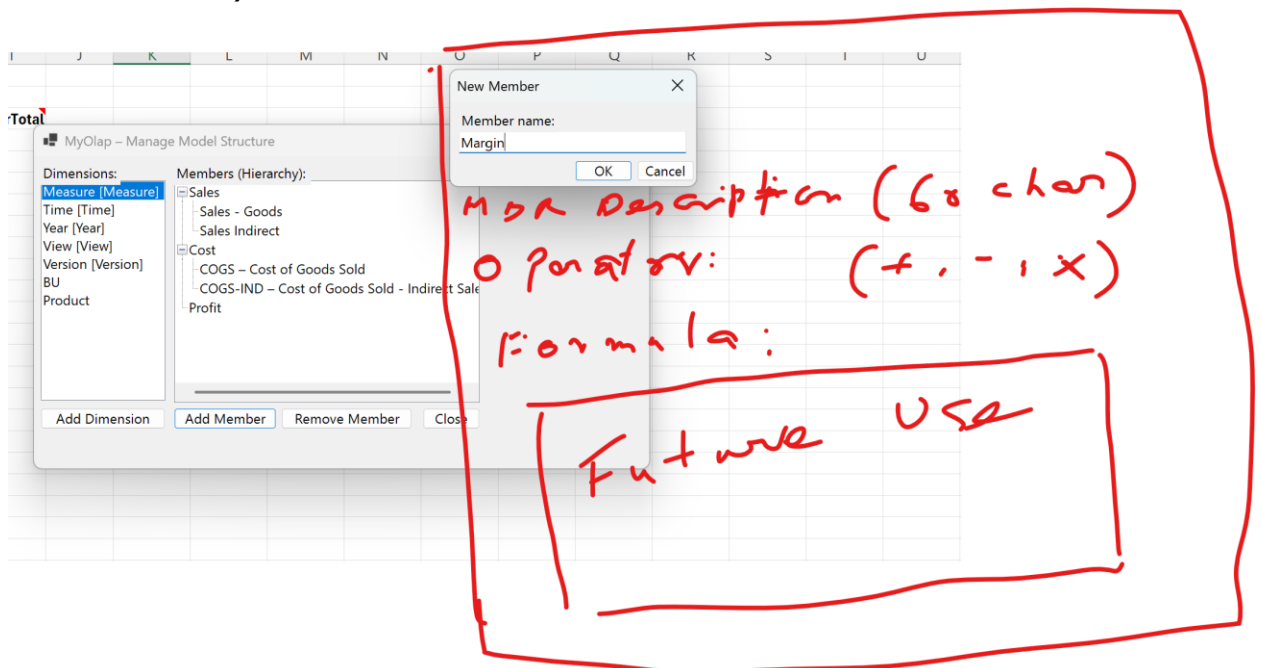

10. For Measures please add a consol operator
E.g. Sales +
Cogs -
So that we can create structure so that:

Sales +
Cost -
Profit

11. Please allow 75 characters for member name and description window. Allow scroll bar for deeper hierarchies

12. When adding a new member, please provide a single window to add member name, description, Consol Operator (+, - or x to mean add, subtract, or ignore in hierarchy rollup) and Formula (to use for future release)

13. Allow deletion of Dimension in the Manage Structure option - other than the main 5 dimensions

14. Sales and Cost rollups should show aggregated data after data load. Currently this is what is shows:

Year: FY26	View: Actual	Version: Draft											
Measure	Jan	Apr	May	Jun	Feb	Mar							
Sales - Goods	470000	160000		260000									
COGS	190000	95000	80000	106000									
Profit	300000	65000	145000	112000									
COGS-IND	225000		115000	42000									
Sales Indirect	245000		340000										

This is how it should appear. Totals for Sales, Cost and Profit should be calculated results as below following the hierarchy order:

Mar 28, 2026

15. When creating a Select Model->New Model option add an option to clone a new model from existing
16. Swap to Row/Col should swap only the selected dimension, in this case View: Actual should be placed on top of months. Measure and other dimensions should stay where they are
17. All view point dimensions should show up in the default view as sum of their members: in this case BU, Customer and Product should show up as Sum of all BU, Sum of Customer and Sum of Product

The screenshot displays a QlikView dashboard with a data table and an open 'MyOlap - Manage Model Structure' dialog box.

Data Table:
